

INTERNATIONAL SUMMER SCHOOL PROGRAMMES

JOIN US THIS SUMMER IN THE BEST CITY IN THE WORLD!

Brunel
University
London

IDEAS FACTORY

Join Design Factory London, an innovative and dynamic hub, which promotes and fosters multidisciplinary collaboration, creativity, and problem-solving, for a 2-week programme this summer. This programme will bring students, faculty members, researchers and industry professionals together from various backgrounds, in order to blend a diverse range of expertise, and encourage and drive creative thinking and problem-solving. This programme will expose students to hands-on, real world experiences and will involve collaboration with industry partners, working on live projects, gaining practical experience and real-world solutions. As well as this, this programme aims to encourage and promote cross-cultural exchange and international collaboration.

Duration: 2 weeks (30th June - 10th July)

Cost: £2,000 (10% discount to partners & alumni).

Study level: Currently studying at UG level.

English language requirements: Good understanding of English is needed.

BRUNEL STORYSPACE

Brunel Storyspace is an on-campus summer school, hosted by world-renowned, award-winning British writers. This two-week programme is comprised of lectures, seminars and workshops, as well as visits to notable London literary landmarks. It's perfect for international arts and humanities students, who have a keen interest in exploring the fascinating world of stories and their significance. Students will study and think about all forms of storytelling – from literary to genre fiction, poetry to life-writing, and world literature to screenwriting, all whilst having the opportunity to explore London. Alongside a series of keynote lectures from leading Creative Writing professionals and English Literature academics at Brunel. Students will also plan and create their own stories and/or critical reflections of stories in workshops hosted by PhD researchers.

Duration: 2 weeks (29th June – 13th July)

Cost: £2,500 (10% discount to partners & alumni).

Study level: Currently studying at UG level.

English language requirements: IELTS 5.0 (or equivalent).

BIOSCIENCES

Join our friendly team of internationally renowned scientists, who are deeply committed to sharing their expertise, in order to make significant strides and breakthroughs in the field of human diseases and syndromes. This programme offers an immersive and pioneering scientific learning experience, enabling students to utilise our cutting-edge laboratories. Over the course of two weeks, students will gain proficiency in a wide range of laboratory-based techniques and will be introduced to a diverse repertoire of bioinformatics tools. This programme will enhance employability skills, such as CV and cover letter writing, scientific English for research manuscript composition, presentation and interview skills. Additionally, there will be plenty of opportunity to engage with experts from medical schools, industry, health, and life sciences, thereby expanding employability opportunities. As well as plenty of cultural immersions activities in the city of London!

Duration: 2 weeks (29th June – 13th July)

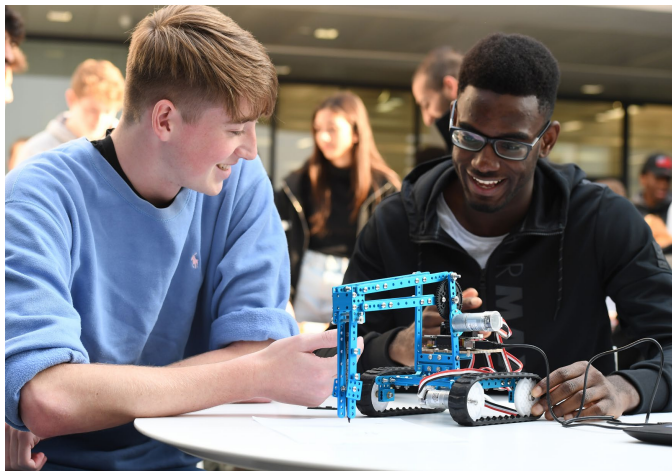

Age: 18 or over

Cost: £2,500 (10% discount to partners & alumni).

Study level: Currently studying at UG level.

English language requirements: Good understanding of English is needed

ROBOTICS & ENGINEERING

Follow in the footsteps of one of Britain's most creative designers and engineers, Isambard Kingdom Brunel, and join us for a specialised and unique programme in Robotics and Engineering.

This programme is aimed at students across the globe who are looking for an immersive experience. It is comprised of academic training, central group project work, interesting lectures on robotics and engineering topics, combined with cultural immersion activities and industrial tours in London, which are guaranteed to enhance the international experience!

Duration: 2 weeks (14th – 31st July)

Cost: £2,500 (10% discount to partners & alumni).

Study level: Currently studying at UG level.

English language requirements: Good understanding of English is needed.
